EXPERIENCE

Customer Success Engineer

Keychain.com

July 2026 – Present | Gurugram, Haryana, India

- Managing end-to-end onboarding for **100+ global clients** on Keychain, an AI-powered CPG platform, helping brands, retailers, and manufacturers operationalize customer and vendor data for their business workflows.
- Driving client implementation from account setup and platform configuration through data ingestion and operational readiness, resolving onboarding blockers to help customers reach a reliable, usable platform setup.
- Built **Keychain Galaxy AI**, an AI-powered ETL extraction agent that automates data extraction and preparation, reducing **manual effort by 40%** and accelerating data processing and client onboarding.
- Transforming, validating, and standardizing customer and vendor data using **Google Sheets, structured templates, and AI-assisted processing**; preparing accurate datasets for the **Metabase SQL database**, ERP ingestion, and downstream workflows.
- Investigating data discrepancies and ingestion failures, performing data-quality checks, and documenting issue details, reproduction steps, and investigation findings to support engineering escalations and improve implementation reliability.

Customer Success Engineer

DronaHQ

Jan 2025 – June 2026 | Remote

- Served as the primary **technical point of contact** for **50+ enterprise clients**, managing onboarding, application deployments, production support, and technical issue resolution.
- Diagnosed **Tier 1/Tier 2/Tier 3 technical issues** involving REST APIs, databases, authentication, webhooks, application workflows, and cloud environments through systematic troubleshooting and root-cause analysis.
- Developed an **AI-powered ticket management agent** to automate initial ticket triage, investigation, and customer responses, with Slack and email escalations for unresolved issues requiring human intervention.
- Developed **DronaHQ AI Agents** for business and customer-support use cases, deploying solutions across cloud-hosted and self-hosted environments.
- Analysed application logs, JSON payloads, workflow execution paths, and SQL queries to reproduce defects, isolate root causes, and provide actionable technical findings.
- Supported enterprise integrations involving REST APIs, databases, webhooks, authentication systems, and third-party platforms, troubleshooting connectivity and data-exchange issues.
- Used **AWS CloudWatch, Datadog, and Grafana** to investigate application and infrastructure issues and support platform reliability and SLA commitments.
- Collaborated with Engineering, Product, and DevOps teams to report reproducible bugs, document investigation findings, validate fixes, and communicate resolutions to customers.

EDUCATION

Master of Computer Applications - 9.1 CGPA

Guru Gobind Singh Indraprastha University

2023 – 2025 | New Delhi

Bachelor of Computer Applications - 9.47 CGPA

Guru Gobind Singh Indraprastha University

2020 – 2023 | New Delhi

SKILLS

- **Technical Support:** Troubleshooting, Incident Management, Root Cause Analysis, Bug Reproduction, Issue Escalation, SLA Management
- **AI & Automation:** LLMs, Prompt Engineering, AI Agents, Workflow Automation, MCP, n8n
- **Cloud & DevOps:** AWS, GCP, Azure, Docker, Kubernetes, CI/CD Fundamentals, Git, GitHub
- **Monitoring:** AWS CloudWatch, Datadog, Grafana, Prometheus, Linux, Shell Scripting
- **Databases:** MySQL, PostgreSQL, MongoDB, Oracle, ClickHouse, Elasticsearch, Redis
- **Programming:** Python, JavaScript, JSON, YAML
- **Networking & APIs:** TCP/IP, DNS, HTTP/HTTPS, SSL/TLS, REST APIs, Webhooks, SSO, Postman, cURL
- **Tools & Collaboration:** Linear, Jira, Zendesk, Salesforce, Slack, Freshdesk, Notion, Google Sheets, Metabase
- **Frontend:** HTML5, CSS3, ReactJS

PROJECT

AI Alert Agent

- Built an **AI-powered incident monitoring system** to track production uptime, infrastructure health, and application failures using AWS monitoring services.
- Automated log analysis, root-cause investigation, and incident summarization to generate remediation recommendations and support faster incident response.
- Integrated **Slack and email alerts** to deliver AI-generated incident summaries and actionable insights, achieving **92% incident summarization accuracy**.
- **Tech Stack:** AI Agents, LLMs, AWS CloudWatch, AWS Lambda, Amazon SNS, JavaScript, REST APIs, Webhooks, Slack Integrations.
